SUBJECT: Cost Estimate for Dover Free Carton Callback Study

Below outlines the assumptions for the upcoming Dover Free Carton Callback Study.

Background:

A free carton of Winston cigarettes was given out to franchise and competitive adult smokers at a race in Dover on June 4th. To receive a free carton, smokers had to show proof of age and fill out their name, address and phone number.

Objective:

- To assess switching level and occasional use level generated by free carton.
- To assess percentage of volume that switchers and OU's give to Winston.
- To assess awareness and usage of free carton, videotape and mini-mag.
- To assess perceptions of Winston.
- To assess participation in Thunder Theater and Race-n-Rock.

Methodology:

RJR will draw names from the list of free-carton recipients from the race held in Dover. They will provide DAC with two Excel files. One will contain ~3,500 incremental records to the RJR database, which will contain adult smoker names, aged 21-64 after telematching. The other file will contain ~3,000 non-incremental records. RJR will provide a demographic profile of each sample.

Six weeks from race date, DAC will contact as many recipients as needed to complete 250 interviews from the incremental sample and 200 from the non-incremental sample. The interviews will purposely reflect the profile of the list in terms of age/gender/usual brand.

Mr. Jack Bellis
Page Two
June 22, 2000

Sample:

We will receive approximately 6,500 total names of respondents who received a free carton of Winston at the Dover race. There should be no Winston usual branders or any menthol smokers in the sample. We will also de-dupe the sample to exclude respondents from the same household and make sure the respondent's name is not listed twice.

Assumptions:

- 10 minute questionnaire
- No open ends
- Data processed against one banner

Timing:

Q're approval	7/7
DAC receives sample file from client	7/12
Interviewing	7/17-7/26
Tabs to client	8/7
Report to client	8/11

Cost Estimate:

Fieldwork/Sample	\$23,780
Data Processing	3,500
Print/Ship	500
Administration/Analysis	<u>2,500</u>
Total (+/-10%)	\$30,280

Jack, if you have any questions, just give me a call.
